

# Add, edit and delete Comments.

This section holds all the comments that the users have made on the articles, News articles and other modules, at the client interface.

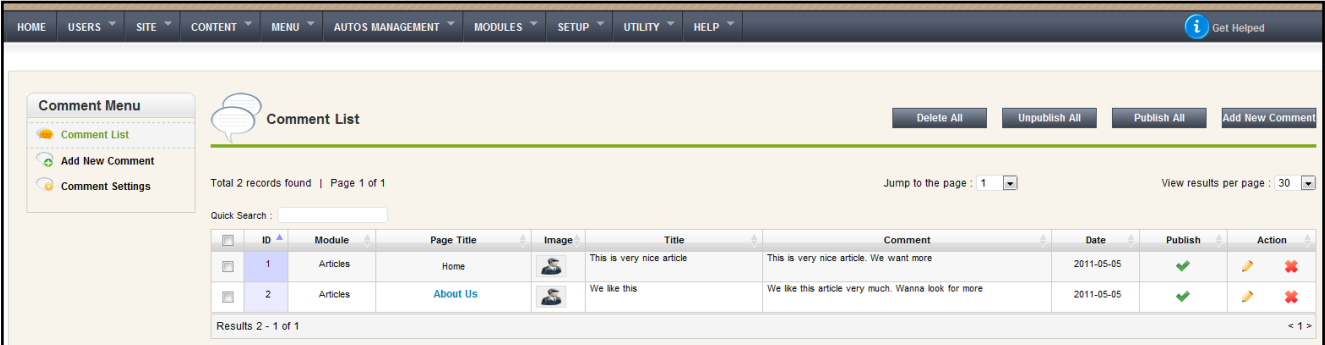

The client comments will not be visible in the comments section under the article the comments are made, at the client support interface, until a user / admin who has the access to moderate the comments, approves them from the control panel.

In order to manage user posted comments tailing to every modules, log on to **ADMIN => MODULES => COMMENT MANAGER** and click on it. You will be appearing to comment management modules to manage user's posted comments if enabled.

1. *Comment List*
2. *Add New Comment*
3. *Comment Settings*

## Comment List

You can see the list of comment posted by the visitor and this comment will be saved under the comments section in the admin control panel, as shown below.

The screenshot shows the 'Comment List' management interface. At the top, there is a navigation menu with options: HOME, USERS, SITE, CONTENT, MENU, AUTOS MANAGEMENT, MODULES, SETUP, UTILITY, HELP. A 'Get Helped' button is also present. Below the navigation, there is a 'Comment Menu' sidebar with options: Comment List, Add New Comment, and Comment Settings. The main area is titled 'Comment List' and contains several buttons: Delete All, Unpublish All, Publish All, and Add New Comment. Below these buttons, there is a search bar and pagination information: 'Total 2 records found | Page 1 of 1', 'Jump to the page : 1', and 'View results per page : 30'. A table displays the list of comments with columns: ID, Module, Page Title, Image, Title, Comment, Date, Publish, and Action. The table contains two rows of data.

ID	Module	Page Title	Image	Title	Comment	Date	Publish	Action
1	Articles	Home		This is very nice article	This is very nice article. We want more	2011-05-05	<input checked="" type="checkbox"/>	
2	Articles	About Us		We like this	We like this article very much. Wanna look for more	2011-05-05	<input checked="" type="checkbox"/>	

Results 2 - 1 of 1

## Add New Comment

Enter Page Url:  

# Comment Settings

Comment setting allows you to join, remove “comment option” from certain modules. For example, you want to add comment option on Product Gallery page and remove comment option from generate pages, this option helps you doing so. Enabled “Comment Module” to show comment under the selected module and disable it if needed.

The screenshot shows a web application interface for managing comment settings. At the top, there is a navigation menu with options like HOME, USERS, SITE, CONTENT, MENU, AUTOS MANAGEMENT, MODULES, SETUP, UTILITY, and HELP. Below the navigation, there is a 'Comment Menu' sidebar with options for 'Comment List', 'Add New Comment', and 'Comment Settings'. The main area is titled 'Setting List' and contains a table with 3 records. The table has columns for ID, Module, Who can view, Who can comment, Automatic Publish, Comment Module, and Action. The 'Comment Module' column shows a green checkmark for ID 1, a red minus sign for ID 2, and a red minus sign for ID 3. The 'Action' column shows a pencil icon for each row. Red arrows point to the 'Comment Module' and 'Action' columns, with labels 'Enable or Disable' and 'Edit / Change' respectively.

ID	Module	Who can view	Who can comment	Automatic Publish	Comment Module	Action
1	Articles	Everybody	Registered User	No	✓	
2	News	Everybody	Registered User	No	✗	
3	Gallery	Everybody	Registered User	No	✗
